

Day 4: Dynamic Frontend Components

Built Components

1. Homepage

The homepage is where users first land. It features a welcoming banner, quick links to car categories, a search bar, and cars listing. It also highlights adds.

2. Category Page

This page showcases cars based on categories like type or price. Users can filter and sort results, making it easy to find the perfect car for their needs.

3. Detail Page

The detail page offers in-depth information about car, including high-quality images, specifications, pricing, and availability. It also includes a "Rent Now" button for easy reservations.

4. Payment Page

On the payment page, users review their booking and complete the payment. It shows a summary of the rental,, and lets users enter payment details.

5. User Page

This personalized space lets users manage their profile, bookings, and settings. They can update personal information, check booking history, and save payment methods for quicker checkouts.

6. Dashboard Component

The dashboard is for admins to track bookings, manage users, and oversee the platform. It includes booking analytics and tools to update car listings and reports.

7. Header Components

The header provides easy navigation with the logo, quick links to important pages, a search bar, and a setting and notification buttons. It also shows a cart for user bookings.

8. Footer Components

The footer gives users access to customer support, legal info, social media links, and important pages like terms and conditions.

9. Search Bar Component

This feature allows users to search for cars quickly. It offers auto-suggestions and filters to narrow down results, making the search process smooth.

10. Wishlist Component

Users can save their favorite cars to a wishlist, making it easy to come back and book later. They can view and manage the saved cars whenever they want.

11. Notifications Component

This keeps users updated with booking confirmations, special offers, and reminders about upcoming rentals or payments.

12. Recent Car Component

Shows a list of cars users have recently viewed. It lets them quickly pick up where they left off and finalize bookings without searching again.

13. Rental Summary

Before payment, the rental summary shows all booking details — car info, dates, pricing breakdown, and total cost. It gives users a clear overview before they confirm the booking.

14. Reviews Component

Allows users to leave star ratings, write feedback, and view others' reviews. Includes an average rating summary and options to sort or filter review.
